Financial Healing

Financial healing. Blessings of deep transformation to each and everyone. During the Egypt Advance group time, I had to work on poverty consciousness as a memory, on a cellular level, on a DNA level. And it was poverty consciousness regarding money, wealth, prosperity. We are now approaching Diwali. We just had our magnificent days of Mother Divine, and now Mahalakshmi is coming with Kuber. Kubera has many, many different qualities.

Shiva is the one who gifted to Kuber the kind of power concerning protection of wealth, management of funds and so much more. I like to come back to financial healing topic. You've heard me several times speak of poverty consciousness. Poverty consciousness come from the surroundings, beliefs, beliefs from the parents. It's a mindset of deep belief about lack, scarcity, limitation, judgment, guilt, shame. And the list can go far.

Why the list can be so long? Because anyone who has, let's call it financial trauma. All the energies coming from that poverty consciousness will have a huge impact on self-confidence, self-worth, what one thinks of oneself. So this puja is coming for Deepavali. Not only Mahalakshmi is coming to bring you, to create for you wealth, prosperity. Also bringing Kubera to heal, to transmute, to transform this limited belief.

Together with the emotional wounds which goes together with the scarcity. What does that mean? Let's imagine you're going to school and the school is taking you all to a week to ski. And some will not go because their parents can't afford. This is an emotional wound connected with finance. Au

Quebecc nous petit pas, n' est Ce pas? So that sense that you are small because you don't have the funds in the house, and I'm speaking when you were a child.

So today I can say to all of you that remember your childhood does not define you. So today, consciously, you can start to step into abundance. Or in a simpler way it will be financial wellness, prosperity, wealth. Ask yourself this question. What are my beliefs? And what are the beliefs that I hold on to concerning money, wealth, prosperity? And you may find out that you judge everybody who has some money more than you. Make a list. The perfect time. So that for the 24 hours of Deepavali something special is for you.

Why are you functioning in a poverty consciousness? Because this energy comes from what entered your field during your childhood and how it is being reinforced by the environment. You know my principle and philosophy on the topic. So I will not go in it. Are you willing to transform your emotional relationships such as negative patterns, wounds. So I will repeat this. Are you willing to transform your emotional relationship with Monies through your inner lens, your inner eye, your inner vision of today's consciousness. Change the story you've been telling yourself about. Change the narrative. You've grown up now. You are a conscious young adult or adult today. Stop allowing any, anyone's belief to be yours. Give back, take back. Heal your financial discomfort, your financial emotional healing.

Stop seeing money as a currency only, money is more than that. it's more than a currency. While you are in the womb, you may have already heard and felt the fear, the scarcity, the fighting about money. Money is a big topic, huge. Indeed, you have money secrets, you have le stigma, I suppose it may be the same word in English. Le stigma around money, childhood poverty, hearing so much about debts in the house, financial instability.

Still today I can see there is financial abuse, unhealthy inheritance, cultural wounds coming from money. Worry, anxiety, all about money, financial triggers. And this will be coming due to the unhealed trauma. Frugal, frugal, maybe frugal, and that can be in an extreme. Financial sabotage. Financial loss which caused crisis in the family, loss of jobs, meaning loss of wealth. There is also another case which I've seen that in Colorado, hoarding. The disease, amassing money, never enough, limited beliefs about money which then will cause money blockages in your energy and so much more.

I have another question for you. Ask yourself, how do I relate to money? When you know money is an issue in your life, the moment you start asking yourself these questions, financial healing will start. The moment you are listening to these words, healing is going on. Thus understanding financial wound is important and overcome the unhealthy aspect of your relationship with money will have to shift, with awareness.

The power, the grip, that strong energy of poverty consciousness will start to be thinner and thinner due to the practice of your healing. For those who always say, think, feel, say money is not enough, I invite you to drop it right now, this moment.

I just activate some deep healing concerning finance in your field. Acknowledge where you are at, meaning you stop resisting, forgive yourself, forgive others, give back, take back, ancestors.

One can easily feel disempowered when you will start looking at all the list. Remember to stay in this new paradigm because the old paradigm narrative with everything that goes with this is over.

When I say healing here, it really means you shift gear from scarcity mindset to an abundant mindset and can be abundant in many, many topics. I invite you, the first thing to do when you become aware, is to be grateful. Be grateful to you. Be grateful that you are alive. You can enjoy the abundance that Mahalakshmi brings to you.

Kubera will support you. How to function so you can use his energy. He's always of service whenever you are ready. Sharing your resources. Observing your personal comfort or discomfort when financial conversation is on the table, during Thanksgiving or Christmas dinner. Align yourself with higher energy. The higher your consciousness will be, the easier it will be to deal with financial healing. What does that mean? It means greater quality of your thoughts, of your feelings, of your emotions. Of your action towards money.

Oh Kubera, bless me. Bless me with riches and prosperity. Not only for me. For me and others. During the Puja, ask Mahalakshmi to pour endless wealth into your life experience. And when I say endless love. It's not only the physical aspect of money but also knowledge, knowledge, wisdom.

When Shiva granted this position to Kubera. Shiva makes sure that Kubera knows how to protect your wealth. How to distribute your wealth. How to manage your wealth. How to find justice in wealth. He's the God of riches. He's the one who bring financial stability, prosperity in your house. In the world of Dharma, a real custodian of wealth. Kubera will also enhance the growth and the flow of your finance. Financial growth together with money which flows with financial wisdom.

We all came on this planet with nothing in our hands. And we all will leave this planet with nothing in the hands. Holding on to the money can block our energy. Imagine energies like a stream, a river. And the more you allow it to flow, the more you will be attracting this same quality of energy.

I like to give you two mantras. Maybe three.

Let me start with the simplest one.

Om Kuberaya Namah. Om Kuberaya Namah. Om Kuberaya Namah. Om Kuberaya Namah.

Then we have the Bija mantra.

Om Shreem Rheem Kleem Shreem Kleem Vitteshvaraya Namah.

Om Shreem Rheem Kleem Shreem Kleem Vitteshvaraya Namah.

Om Shreem Rheem Kleem Shreem Kleem Vitteshvaraya Namah.

Bijas. Seeds of all the qualities of Kubera. Now when poverty consciousness has been really part of your everyday consciousness. Where the poverty is gone and another consciousness takes over. We have no fear whatsoever of the finance. Then we look for Kubera to ask him to bless us with a steady flow of wealth. Will use the Bija mantra. And one word will change. For instance, it will be

Om Shrim Rhreem Klim Shrim Klim Daneshvaraya Namah.

And you can even say, like you put your hand on your heart chakra. You can say

Om Shrim Klim Shreem Klim Daneshvaraya Swaha.

You can do this 108 times.

Om Shrim Hreem Kleem Shrim Kleem Daneshvaraya Swaha.

Om Shrim Hreem Kleem Shrim Kleem Daneshvaraya Swaha.

Om Shrim Hreem Kleem Shrim Kleem Daneshvaraya Swaha.

Activation has started.

Entering this new paradigm consciously, I bless you with the grace of knowledge. With the power of wisdom. Welcoming your spirituality, your spirit energy. Together with wealth. Empowered with financial healing, financial stability, and prosperity.

A lot of energy is coming. Really coming.

For your financial growth, financial flow.

With a healed and free relationship with your finance.

Thank you. Thank you. Thank you for those who came for this program. Because I've been able to see. Now, I'm creating this Puja for you. And it's for all of you.

Your true nature holds endless wealth. Endless. In the greatness of you. In the power of Life itself.

Welcome Mahalakshmi. Welcome Kubera. With all their different mantras in your life.

Deepavali, the festival of light. The festival of life. In your glory, let us celebrate who you are in your wealth.

Om Jai Jai Sai Maa, Jai Jai Sai Maa
